

HIGHLIGHTS 2021

Industry Data & Research

Invest Europe's research department is the most authoritative source of reliable data on the European private equity and venture capital ecosystem. Trusted by our members and public institutions, used by the media and academics, Invest Europe reports empower our political advocacy and communication work. We aim to tackle - with facts and data - the issues the industry faces.

Highlights 2021

- Launch of the "Positioned for the Challenge: Capital Under Management & Dry Powder" report, a ground-breaking analysis demonstrating the clear expansion of the industry
- Release of the transaction value analysis report, giving a new perspective on our investment data since 2010
- Two successful collaborations with the EIF on their VC survey and on the VC factor pandemic edition
- The second edition of our mid-market and large buyout market sentiment survey with Arthur D. Little, measuring the pulse of the industry by combining the views of GPs and LPs
- A new edition of the essential report underlining the industry's key role in employment and job creation: Private Equity at Work
- Publication of our Performance benchmark report demonstrating the outperformance of European private equity relative to public markets using the mPME methodology from Cambridge Associates
