

Introduction to Private Equity Practicum

Live Online Classroom, 24-25 September 2026

Building on our [Introduction to Private Equity on-demand e-learning](#), this practical session is designed around an interactive business simulation game where participants step into the shoes of fund managers and experience the full PE fund investment cycle, from forming a PE fund to exiting and raising a subsequent fund.

Lead by experienced practitioners, participants will:

- Work in teams to raise funds, invest in promising companies & exit them
- Discuss the different stages in PE & VC investments and understand their implications in terms of team support
- Perform more efficiently thanks to a better understanding of the private equity context

.....
" The course explains all the different stages and aspects of PE in a "simple" way, allowing the participants to engage via the group work."
