

# FINANCIAL MODELLING

Live Online Classroom, 10-12 June 2026

---

This two-day-and-a-half course focuses on best practices and is aimed at professionals who want to develop practical skills for building forecast models of financial statements in Excel starting with the analysis of historical financial performance.

Financial models will be structured from the underlying business drivers and translated into a high-quality operating model that results in a fully integrated forecast of income statement, balance sheet and cash flow statement.

.....  
*“Great instructor, very experienced in PE valuations; very good organization, and fun group.”*

**2025 Course Participant**

## LEADING SPEAKER

---

**Joost Alberts** is Partner at **Vantage Valuation** and has more than 12 years of international experience in valuations and quantitative corporate finance.

Previously he was a Partner at Value Insights. Before that, Joost worked in the valuation and financial modelling team at EY SaT.

Joost provides technical training on financial modelling and valuation at various international banks and universities.

## WHO SHOULD ATTEND?

---

The course is most suitable for professionals such as Financial Accountants, Controllers, Portfolio Managers, Investment Managers, Associates & Analysts who are involved in building financial models to evaluate investment opportunities.

The prerequisites of this course are basic excel, finance and accounting skills. Please note that while Excel is used extensively, and maximizing the use of the software is a key component of the programme, this is not an Excel training course.
